-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: there is no heading for each section of the specification. Applicant is requested to insert headings in the appropriate sections of the specification.
2. The abstract of the disclosure is objected to because the abstract includes two paragraphs. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5, 7-12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kenjo et al (US Patent No. 6,086,231).

Kenjo et al discloses a light producing device comprising a light source (Fig. 4, 44), a reflector (42) reflecting the light rays emitted by the light source towards a lens (46) comprising a peripheral flange and being held by a support (45), where the support comprising an annular surface limited at its external

Art Unit: 2872

peripheral by a cylindrical rim (53), wherein the cylindrical rim is deformed in the direction of the annular surface (Fig. 7, A) in order to envelop toe peripheral flange of the lens and hold it in place without requiring an additional component (see Fig. 7) and the deformation of the cylindrical rim being performed by applying on this rim a force parallel to the optical axis of the lighting. The support is made from a viscoelastic material, plastic (see column 6, lines 45-54). The deformation of the cylindrical rim is performed at at least three points on this rim (52b). The method of producing lighting device such as, deforming, is met by the disclosure of the prior art.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 6 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kenjo et al.

Art Unit: 2872

Kenjo et al discloses the claimed invention as set forth above except the force applied on the cylindrical rim is between 100 dN and 3000 dN. It would have been obvious to one of ordinary skill in the art to find the value, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.
